Summary

I seek to use my superior knowledge to effectively contribute to your company. I am a quick learner who thrives in collaborative environments and approaches challenges with a problem-solving mindset.

Projects

Health Management System

A health management website built using HTML, CSS, JavaScript, jQuery, and PHP for backend. It features a responsive layout, interactive elements, and smooth user interactions. This project showcases full stack development skills and proficiency in recreating modern website designs.

Virtual Machine - Cloud Computing

Focused on creating and managing Virtual Machines (VMs) using cloud platforms like AWS. Demonstrates deployment, configuration, and management of VMs, highlighting benefits such as remote access, resource allocation, and cost efficiency.
